Photo exhibition: Emotions – a triptych

The conference organizers would like to invite the conference participants to visit the photo exhibition "Emotions - a triptych". It displays work of the Dutch photographer Marrie Bot. The focus is on three main themes: pilgrimage in Europe, mentally retarded people, and mourning rituals. The pictures show people experiencing their strongest feelings. The Dutch media were unanimous in their praise and emphasized the overwhelming expressiveness of the pictures. The exhibition is located in the foyer near the auditorium (C – building).
